In response to your request, Bayer MaterialScience's **Makrolon, Bayblend, Desmopan, Makroblend, Apec, Texin, Makrofol and Bayfol** grades comply with the requirements of:

- EU Directive **2002/95/EC** on the restriction of the use of certain hazardous substances in electrical and electronic equipment (so-called RoHS Directive) and its amendments (**2005/618/EC** and others).
- EU Directive **2002/96/EC** on waste electrical and electronic equipment (so-called WEEE Directive) and its amendments.

A few of our Makrolon, Makroblend, Makrofol and Apec types contain a non-regulated brominated flame retardant. We would like to make you aware of the parts identification requirement for these grades to allow the selective treatment according to Annex II.

- EU Directive **2003/11/EC**, amending for the 24th time Council Directive 76/769/EEC, relating to restrictions on the marketing and use of certain dangerous substances and preparations (pentabromodiphenyl ether, octabromodiphenyl ether).

---

This information and our technical advice - whether verbal, in writing or by way of trials - are given in good faith but without warranty, and this also applies where proprietary rights of third parties are involved. Insofar as Bayer MaterialScience AG is not responsible for damages caused intentionally or through gross negligence, we shall not be liable for consequential damages or purely financial losses. This disclaimer does not apply to damages involving death, bodily injury, or loss of health. Mandatory legal provisions on liability are unaffected by this statement.

Our advice does not release you from the obligation to verify the information currently provided – especially that contained in our safety data and technical information sheets – and to test our products as to their suitability for the intended processes and uses. The application, use and processing of our products and the products manufactured by you on the basis of our technical advice are beyond our control and, therefore, entirely your own responsibility.

Our products are sold in accordance with the current version of our General Conditions of Sale and Delivery.

- EU Directive **2000/53/EC** (End-of-Life Vehicles Regulation) and its amendments (**2002/525/EC** and others).

Compounds of cadmium, lead, mercury and hexavalent chromium, flame retardants PBB and PBDE including pentabromodiphenyl ether (CAS-No. 32534-81-9) and octabromodiphenyl ether (CAS-No. 32536-52-0), have not been intentionally added for the production of all **Makrolon, Bayblend, Desmopan, Makroblend, Apec, Texin, Makrofol and Bayfol** grades. The presence of analytically detectable traces of the above mentioned heavy metals or heavy metal compounds, which occur widely and have possibly been introduced into our product via the raw materials, auxiliaries and additives, can not be excluded. Although these products have not been analysed for these metals, but we would not expect the total of these metals to exceed 100 ppm.

We hope you will find this information useful. If we may be of any further assistance, please feel free to contact us.

Bayer MaterialScience AG
